RE: Nutting Truck and Caster NPL Site (MND006154017)
Faribault, Rice County, Minnesota

Dear Mr. Karl:

The Minnesota Pollution Control Agency (MPCA) concurs with U.S. Environmental Protection Agency's (U.S. EPA) recommendation to delete the Nutting Truck and Caster Site from the National Priorities List (NPL). As summarized in the MPCA August 12, 2009 letter to U.S. EPA, all appropriate Superfund response actions have been completed at the Nutting Truck and Caster NPL site. (See enclosed)

The MPCA appreciates U.S. EPA's support in addressing the contamination issues at the Site.

If you have any questions about this recommendation, please contact Gary Krueger, of my staff at 651-757-2509.

Sincerely,

A handwritten signature in black ink, appearing to read "Kathryn J. Sather".

RE: Nutting Truck and Caster NPL Site (MND006154017)
Faribault, Rice County, Minnesota

Dear Mr. Karl:

The Minnesota Pollution Control Agency (MPCA) has determined that all appropriate Superfund response actions have been completed at the Nutting Truck and Caster (Nutting) National Priorities List (NPL) site. These actions were completed in accordance with the September 27, 1987, Response Order by Consent Order (CO) between the MPCA and Nutting. U.S. Environmental Protection Agency (U.S. EPA) was not a signatory party to the CO. The MPCA has determined that provisions set forth in the CO have been met and therefore the CO has been terminated.

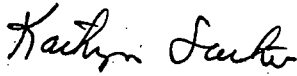

The MPCA has been the lead regulatory agency for oversight of Superfund response actions at the Nutting site (Site), which was included in the Deferral Project agreement between the MPCA and U.S. EPA. All response actions that have been completed at the Site have been in compliance with the Minnesota Environmental Response and Liability Act, Minn. Stat. 115B, and were not inconsistent with requirements set forth in the National Contingency Plan. The MPCA recently approved the delisting of the Site from the State's Permanent List of Priorities or State Superfund List (see enclosed). An environmental covenant and easement for the property is in place which ensures long term protectiveness.

Therefore, the MPCA is recommending that the Nutting Truck and Caster Site be delisted from the NPL on the basis that all appropriate Superfund response actions have been completed at the Site, and that the Site no longer poses a threat to public health or the environment.

Mr. Richard Karl
